

## Product Customization Inquiry

---

1. What are you going to inspect? What is your application?
  
2. What specific functions do you need? Please list your product specifications and special requirements we should know.
  
3. What is the set up you are working with?  
*For example, if it is a microscope, please include all parts of the microscope setup you require, such as cameras, lighting, and stand.*
  
4. Is there an existing product on the market or on our website that you are considering, which you can base the customization on?
  
5. Do you have a photo or CAD drawing (Computer Aided Drawing) of the product?
  
6. How many units do you need? How often are you going to purchase the product? Every month? Every year?
  
7. What is your price range or budget?
  
8. When do you expect to get the finished product?
